- | | | | |
|------------------|---------------|---------------------|--------------|
| • NextJS | • ReactJS | • Typescript | • PostgreSQL |
| • Prisma | • TailwindCSS | • Docker | • HTML/CSS |
| • Apollo/graphql | • Hasura | • Contentful/Sanity | • Git/Github |

Professional Experience

GEERD 02/2025 – 07/2025
Web developer remotely

- Converted Figma designs into responsive, production-ready pages for educational platforms using React and Next.js
- Enhanced existing school website by adding new pages with static site generation, SEO optimization, chatbot integration, and multilingual support (Next.js, Next-intl, Tailwind CSS)
- Enhanced existing educational web application by implementing new features and optimizing performance using React, Apollo Client, GraphQL, and Hasura
- Built a blog platform with Sanity CMS integration and developed a full-stack survey application with PostgreSQL database, Prisma ORM, and Better-Auth authentication
- Demonstrated proficiency in modern web technologies including React, Next.js, GraphQL, PostgreSQL, and responsive design principles

Projects

Product assessment app 🔗

Technologies: NextJS, TailwindCSS, Headless-ui, Better-Auth, PostgreSQL, Prisma

web application designed to evaluate and improve product development practices for startups and growing companies. Built with modern technologies to provide actionable insights and personalized recommendations.
